

MOBILE

CEMENT ADDITIVES PRODUCTION PLANT

The **Mobile Cement Additives Production Plant** series of production units have been designed for a fast and flexible production in the Cement Chemicals Industry.

This Mobile Cement Additives Production Unit is a compact design and a ready to use device.

We fit the
**CEMENT
ADDITIVES
PRODUCTION
PLANT**
into a
CONTAINER!

Low Cost of Investment
low initial investments
no assembly costs

Quick installation
fast production
short delivery time
quick to set up

Transportability
easy transport
transported on the back of a truck
picked up and dropped anywhere

Plug and Run Unit
easy to use
needs only an electrical connection to plug and run
easy assembly

Automation
possibility of fully digitized
possibility of connection to your current automation
possibility of programming and management remotely
weight controlled with loadcells

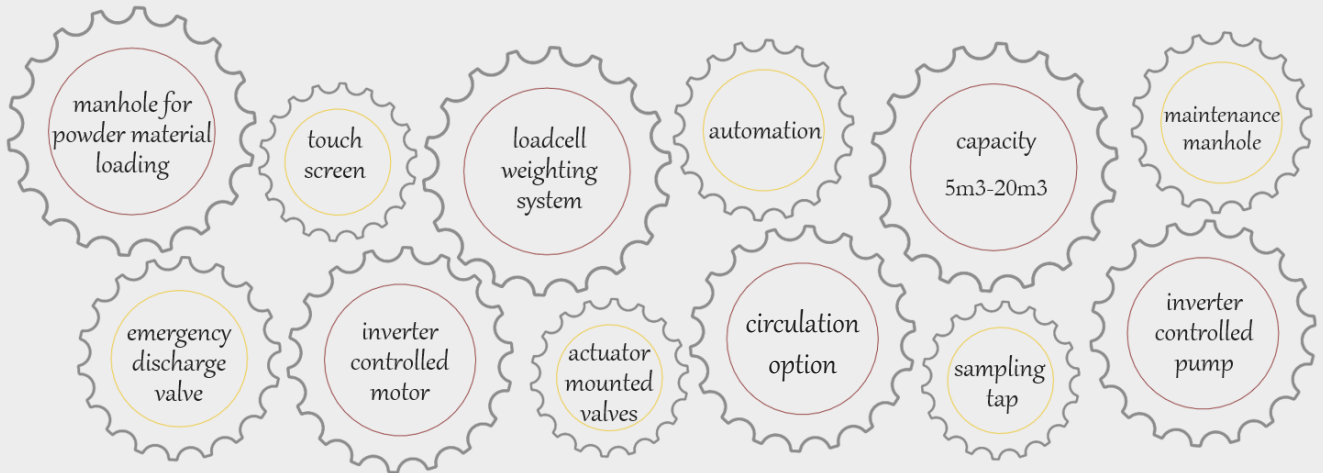

Modular Units
flexibility and agility in production
possibility of different capacities
locked and secured
shall be hooked-up side-by-side to increase production

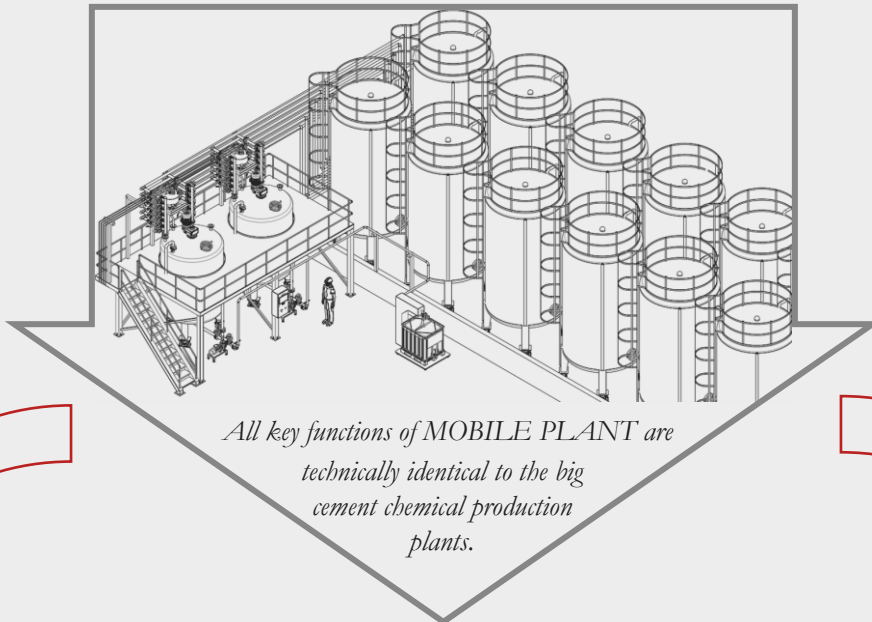

The foremost advantage of Mobile Cement Additives Production Plants is their transportability.

The MOBILE PLANT is a fully-functioning production unit that fits entirely into a 10 and/ or 20-foot shipping container.

The ability to produce Cement Additives on-site substantially reduces transportation expenses and mitigates the risk of project delays.

Lower initial investments than stationary plants!
